

User Interface Lab 2 (Group 27)

Group Members

- Dylan Toh
- Wong Jiakang
- Andy Low

Each Member Contributions

Andy:

- Discover an additional 10 products and their respective images to include in the grocery store, identify any additional constraints, and appropriately configure the restrictions for each product item.

Dylan:

- Enhanced the user interface by incorporating product descriptions, images, and quantity selection options for each product.
- Tailored the user interface to meet Lucie's preferences by enlarging the font size of the web page and arranging the products in the product section with the cheapest ones displayed first.

Jiakang:

- Implemented code on the cart page to facilitate quantity adjustments for adding more of each product to the cart.
- Additionally, integrated code to display the total price of each product within the cart section.
